Work Package 8: Mutual recognition and endorsement campaign

Anna Moreno

ENEA

Task 8.1   Mutual recognition criteria setup

- The idea is to use the Memorandum of Understanding methodology, already used for the Pillar one project, implemented with the certification of non-formal and informal competences. This is a very delicate task because, till now, only people going through the formal VET system can get qualification valid at national level. Luckily, in January 2013 the decree n.13 of the Ministry of labor, has set criteria for certifying also non-formal and informal competences so it will be easier to find agreement on this issue.

- ENEA, CSA, AGCI, ITS, ECUBA, FLA, SVIM

Task 8.2 Agreement signature among Provinces, Regions

- As previously said, the idea is to get the involvement with a "door to door" approach through the partners involved in WP2 which have been "included" in the local process for the qualification system of the regions.

- ENEA, CSA, AGCI, ITS, ECUBA, FLA, SVIM, DITNE, RENAEL

Task 8.3 Quality label system implementation

- The quality label system, developed in WP 6, will be promoted in all the Regions in order to engage other stakeholders. It is important that the quality label becomes a national recognized system to qualify the numerous SMEs active in the building sectors. We expect the refurbishment will be one of the most important activity of the next years and it is important to give confidence to private and public investors.

- ENEA, CSA, AGCI, ITS, ECUBA, FLA, DITNE

Outputs and Deliverables

The main outputs of this WP are:

- O 8.1 A formal model, the Memorandum of Understanding, to ensure the endorsement of the BUILD UP Skills BRICKS achievements

- O 8.2 The involvement of all the stakeholders through the large network promoted by the partners of WP2

- O 8.3 The implementation of the quality label realized in all the Italian regions

Deliverables

- D 8.1 MoU model for mutual recognition

- D 8.2 MoU signed by at least ten main stakeholders

- D 8.3 Quality label criteria for enterprises
